Legend

[1] Dashed lines or boxes indicate a potential but unconfirmed source or transport mechanism of the potential exposure pathway.
[2] These known releases and unknown sources would be properties located within or adjacent to OU 4 boundary.
[3] Includes particulates and volatiles.
[4] A shaded box indicates a potentially complete exposure pathway for that receptor.
[5] Surface soil is from the depth range of 0 to 1.0 foot below ground surface.
